Martin Huťka

Junior Backend Developer · Java / Spring Boot

Vrútky, Martin District, Slovakia · matohtk@gmail.com · +421 914 340 260
GitHub: github.com/M4H44 · GitLab: gitlab.umb.sk/mhutka · Online CV and projects: m4h44.github.io/cv-site/en

PROFILE

Junior backend developer focused on Java and Spring Boot, with frontend work in React and TypeScript. Currently rewriting a corporate attendance and shift management application from PHP to a Spring Boot + React architecture — five modules rewritten and three designed from scratch, including database design, an authorization system, an audit log, GDPR and automated tests. Also collaborating on the development of the Školium learning platform (Laravel, Vue 3), with changes deployed straight to production via GitHub Actions. Alongside that, studying Applied Informatics and Software Development at Matej Bel University (3rd year, part-time). Years of management experience in the automotive industry bring analytical thinking, a systematic approach and ownership of results.

TECHNICAL SKILLS

Backend — Java Java 21 (OOP, collections, streams) · Spring Boot 4 · Spring Data JPA / Hibernate · REST API, DTOs, validation · Spring Security (session login, BCrypt, CSRF) · role-based authorization (@PreAuthorize, role hierarchy) · Flyway migrations

Backend — PHP and Node.js PHP 8, Laravel (Eloquent, migrations) · sending e-mails (SMTP), localization · Node.js, Express · REST API, routing, middleware · authentication and session management · multi-role applications

Databases PostgreSQL · MySQL / MariaDB · SQL (joins, aggregations, views) · schema and relationship design

Frontend React 19 (components, hooks) · TypeScript · Vue 3 (Composition API), Inertia.js · Tailwind CSS · React Router · Vite · JavaScript (ES6+) · HTML5, CSS3, Bootstrap

Testing JUnit 5, Mockito · MockMvc · @DataJpaTest (database integration tests) · role and permission tests · Vitest, React Testing Library

Tools Git (GitHub, GitLab) · GitHub Actions (CI/CD) · Maven, npm, Composer · Docker, docker-compose · IntelliJ IDEA, WebStorm, VS Code · Linux (Ubuntu) as main development environment, Windows

EXPERIENCE

Java Developer — corporate application (Continental) | June 2026 – present

IT Academy s. r. o.

- five modules rewritten from the legacy PHP application: shift calendar, attendance, attendance rules, absences and overtime, qualification matrix
- three modules designed and built from scratch, with no PHP counterpart: user management, audit log and employee training
- audit log immutable at database level (triggers), old and new values in JSONB, IP address, deletion only after archiving
- training: HR uploads materials (PDF, video up to 500 MB) and assigns them by company, department, role, team or individual; employees confirm receipt with their password
- GDPR consent: without consent a request is recorded anonymously, the backend decides whether the name is shown
- password security: 6-month expiry, last 3 passwords blocked (compared via BCrypt) and a similarity check against the previous password
- role hierarchy and endpoint-level authorization (Spring Security), login attempt rate limiting
- PostgreSQL database design, versioned migrations (Flyway) including database views
- routing (React Router) with role-based route guards
- more than 350 tests I wrote myself, unit and integration, on backend and frontend (JUnit 5, MockMvc, @DataJpaTest, Vitest)
- PDF report export (OpenPDF), Docker environment, Git workflow

Developer (collaboration) — Školium learning platform | October 2026 – present

skolium.sk · Laravel, Vue 3, TypeScript, Tailwind, MySQL, GitHub Actions

- changes deployed straight to production via GitHub Actions (CI/CD)
- production e-mail setup via GitHub Actions secrets and the deploy script
- Slovak localization of Laravel (laravel-lang) including server deployment
- CI changes: removed vendor/ from git, dependencies installed with Composer in the pipeline
- bug fixes on the parent dashboard and testing the avatar state logic

Management and technical positions in mechanical engineering and automotive | 1999 – present
Various employers, Martin region, Slovakia

- leadership of production teams of up to 250 employees
- planning and optimisation of production processes, responsibility for results
- cooperation with technical and IT departments

(detailed experience available upon request)

PERSONAL PROJECTS

Booking system for commercial services | in development
Node.js, Express, MySQL, Docker

- multi-role application for managing service reservations (tire shops, gyms, trainers)
- management of available time slots, users and their bookings
- activation and deactivation of services, user and administrator interfaces

Student grade book — web application | working demo
Node.js, Express, MySQL, Docker

- multi-role application (admin, teacher, student)
- management of users, classes, subjects and grades
- REST API, database design (MySQL/MariaDB), Docker environment
- created as a semester team project and actively developed further

Investment calculator | published
HTML, CSS, JavaScript, GitHub Pages

- compound interest calculation with inflation, risk profiles and ETF recommendations
- broker comparison, available in 5 languages (SK, CZ, EN, HU, PL)

EDUCATION

Matej Bel University – Faculty of Natural Sciences, Banská Bystrica | 2024 – present (3rd year)
BSc in Applied Informatics and Software Development — focus on backend development, web applications and databases

Matej Bel University – Faculty of Economics, Banská Bystrica | 2019 – 2024
MSc in Economics and Business Management

Secondary Technical School – Mechanical Engineering | 1988 – 1992
CNC Machine Programmer

CERTIFICATES

Web Application Development in Java (accredited programme) | 07/2025 – 11/2025
ITnetwork Academy Slovensko s. r. o. · 233 hours · Java SE, OOP, Spring Boot, Hibernate, REST, Git, testing, JavaScript, React

LANGUAGES

- Slovak — native
- English — B1

ADDITIONAL INFORMATION

- Source code of the projects available upon request.
- Part-time studies allow working full-time.
- Willing to learn new technologies and work in a team.
